### **CATRENE started Call 6**

CATRENE, the EUREKA Cluster for European co-operative R&D in micro and nanoelectronics ( $\Sigma!$  4140), has closed its 6th Call for project proposals. The labelling of projects, which will start after the evaluation and selection process, is scheduled in October and December

2013. Projects are expected to start from 01 January 2014 onwards. With 33 projects resulting from the five previous calls, involving more than 320 participating organisations from 19 European countries, CATRENE is an important European programme in nanoelectronics supported by industry and national governments.
