## AENEAS & CATRENE Brokerage Event - 2011 ENIAC JU and CATRENE Call for Proposals

Feb 1, 2011 to Feb 2, 2011

Berlin (The Park Inn) / Germany

The event aims at facilitating the creation of new consortia and new projects by giving all interested parties the opportunity to meet and to discuss proposals related to the 2011 ENIAC JU and CATRENE call.

The agenda will be based on the document Vision Mission Strategy (VMS) for European Micro and nanoelectronics and also on the Annual Working Plan 2011 for ENIAC JU projects.

The elaboration of the VMS involved the major industrial and research organisations in the future of micro- and nanoelectronics in Europe. The document's time horizon is of three to six years and encompasses the co-operative part of the research and development (R&D) within public-private partnerships. It is intended as strategic document for the two Europe-wide funding instruments in this field: CATRENE under the EUREKA framework and the ENIAC Joint Undertaking (JU).

Agenda:

Beginning with a brief introduction of the funding tools, the day will continue with working sessions that focus on each of the sub-programmes to be addressed in the 2011 call. During these working sessions, participants are invited to present project ideas, to provide a sketch of a desired consortium, and to make a first outline of the relevance of the project.

The day will be concluded with a panel consisting of the sub-programme owners and 1 or 2 representatives of the microelectronics industry. Sub-programme owners will be asked to present a brief summary of their respective sessions.
